

* Chaldaea Anglicanus :

Being an ALMANACK
For the Year 1696.
280 H. H. And from
The Creation of the World, 5645.

The title is to be added
The Almanack for the Year 1696.
In which is contained The motion of such Planets as
the diurnal motion of the Planets, their variable Con-
junctions, Eclipses of the Sun and Moon, and other Confi-
gurations of the wandering Stars; also the Sun's
Togethers with the Rising and Setting of the Sun; Break-
of day and Twilight; day increase and decrease
Also the Rising, Setting and Setting of the Moon
and seven Stars. And judgments for the four
parts of the year, and other usefull things; the like not
in any extant.

Calculated for the Meridian of London,
whose Latitude is 51 degrees, 32 min.

By MATTHEW HOBBS,
Student in Physick and Astrology,
Living at Finsbury Church Alley in Bishopsgate Street

Non possumus omnis — Dedi annis quinque calendarum,
Et prospere, que eorum in succedunt annis.

LONDON, Printed by John Newland
for the Company of Stationers, 1696.

To the READER.

Courteous Reader,

I Here present you with a little yearly Book, and do hope it will be kindly esteemed of, by all my kind Countrymen, and if God spare me life, I shall every year furnish it with something or other which may be acceptable, and serviceable to you all, in the interim I commend this to your friendly Censure, and rest ready to do you any service I may

MATTH. HOBBS.

Of the lengthening of the day.

Many People thing that the days lengthen always alike, but it is not so. The 11th. of December is the shortest day, and is 7 hours and 13 min. long, and from thence to the 21st. day, the day is increased 21 min. and from thence to the 20th. of January the day is increased 1 hour and 29 min. more; so that you may see the day is increased or lengthened, 1 hour and 8 min. more this last 20 days, than they did the first 20 days. And again, some say and think that the day is lengthened an hour and half at Twelvemore, 'tis not so, they are lengthened by 36 min. and not an hour and half till (St. Paul) the 25th. day of January, &c.

Of the decreasing of the day.

THE 11th. of June is the longest day, and (in Latitude of 51 degrees 38 min.) at London the day is 16 hours 26 min. long, but at Stratford (which is in the Latitude of 52 degrees and 2 min.) the day is 16 hours and 34 min. long, so that the day is 8 min. longer at Stratford (which is within 6 Miles of Buckingham) than it is at London, &c. From the 11th of June to the 1st. of July, which is 20 days, the day is shortened 21 min. And from the 1st. of July to the 21 day of the same Month the day is shortened 47 min. more. So that we may see the day is shortened 26 min. more the last 20 day, than they did the first, and again from the 21st. of July to the 1st. of August, the day is decreased 1 hour and 10 min. which is 30 min. more than the last; so that we may plainly see that the days do not increase and decrease always alike, &c.

A Table of Simple Interest at 6 per Cent.

	Days	A week	A month	2 months	3 months	4 months	5 months	6 months	7 months	8 months	9 months	10 months	11 months	12 months	A Year.

This Table shews the Interest of any sum of Money from £1 to £100, from a day to a year. And by the help of Addition you may compute the Interest of any sum whatsoever; and note that for the greater exactness the penny is divided into 100 parts, so that 25 parts are a farthing, and 50 parts an half-penny, and 75 parts a farthing, &c Examples.

The Interest of £100 for six months one week and one day, is thus found by the Table.

Interest of £100 for 6 mon. 03 d. 1 h. 1 m. 1 d.
 for 1 week 00 2 4 6 6 7 1 3 2 7 half-p.

29	William 3 1650 1713			

A Prince by Heaven chosen his Birth deign'd

To be admir'd and lov'd by all Mankind;

His Piety and Justice plainly shew.

None ere was more God's Substitute below.

Gracious to all Mankind, divinely good.

Had Sodom had but tea such is had flood.

May Heaven that hides the sacred Lives of Kings,

Protect you under carefull Angels wings.

May Peace and Plenty in your Triumphs meet,

And Foes contend to worship at your Feet.

A Table of the Terms for this year 1661.

Hilary Term begins January 23, and ends February 13.
And hath four Returns.

Octab. Hilary. Januar. 21 } Craft. Purif. Febr. 11
Quind. Hilary. Januar. 28 } Octab. Purif. Febr. 15

Easter Term begins April 29, and ends May 25.
And hath five Returns.

Quind. Pasch. April 27 } Quind. Pasch. May 18
Tres Pasch. May 4 } Craft. Ascent. May 22
Mens. Pasch. May 11 }

Trinity Term begins June 12, and ends July 13.
And hath four Returns.

Craft. Trinit. June 8 } Quind. Trinit. June 12
Octab. Trinit. June 15 } Tres. Trinit. June 29

Michael. Term begins Octob. 28, and ends Novemb. 23.
And hath six Returns.

Tres. Mich. Octob. 20 } Craft. Mart. Novemb. 12
Mens. Mich. Octob. 27 } Octab. Mart. Novemb. 19
Craft. Anim. Novemb. 3 } Quind. Mart. Novemb. 16

Would men be just, on terms we need not stand,
But live in Love and Peace throughout the land.
For People are with Law-tricks so beset,
The Suit proves worse than losing of the Debt;
Hang't, hang't, refer the Case, and cease your fury,
Two Friends may do as well as Judge and Jury.

First Quarter the 30 day about mid-night.

January 1696.

I never knew what 'twas to grieve before,

Nor e'er the pangs of mighty Sorrows bore,

Perhaps some ceremonial Tears might fall

At a kind Friends lamented Funeral.

Peevish by turns, by turns with grief perplext,

Mourn'd for a day, look dogged all the next.

February 1696.

But those slight troubles soon were wip'd away.

Deepest impressions make the longest stay.

A superficial love we soon forger,

But pious Princes claim a nobler Debt,

We can't alafs revive this drooping Plant,

Shod clowded Eyes distill whole showers — we can't!

March 1690.

Great is the sorrow that dear Objects move,
Their loss we most lament whom most we love.
Queen Mary's fate, none without mourning beats,
For her we ought to live in Age in Tears:
Condemn'd to mourn, and yet to mourn in vain
Augments and urges the progressive Pain.

The Heavens seem
yet to bless our Nation
with a hopefull Con-
tinuance of Peace and
Tranquillity; our Na-
tion should either in
Action or Council
perform some more
than ordinary matter
in some foreign Parts

Quae regis in terris
nostris nos plenis labitis?

April hath ~~XXIX~~ days.

Full Moon the 7 day about 3 in the afternoon.

Last Quarter the 14 day at 6 at night.

New Moon the 21 day about 11 in the morning.

First Quarter the 29 day at 4 in the morning

And tho' at last our wearied Eyes may dry,
So blest a Memory can never die.
A Queen so wise, so pious and so great,
Her self was able to support the State,
But how shall we our grief for her sad fate!

First Quarter the 28 day at 3 at night.

May, 1696.

No Kingdom in the World did e'er possess
A greater Blessing, nor did e'er the like; yet
She had indeed a mighty Hand o' Work to do,
To govern mad Men in their raving fits;
At ease upon the heady Mob she'd sit,
Justice the Whip, and Prudence held the Bit.

Saturday	14	21										

2784 June, 1896.

A Race of Men, without a page, For y' field,
Run mad with pride, and thought they were inspir'd,
Always dissatisfy'd, from their packs
Was ne'er so easie, still it gall'd their back,
Israel would murmur when they liv'd so well,
Wimp'ld with Quails and Manna to Rebell.

July hath ~~xxxi~~ Days.

Full Moon at day. Height 3' in the afternoon. 14 Dec 2004 A

Left Okarito at 7.30 am this morning.

New Moon 18 day, after sun rise morning.

First Quarter 27 days after beginning.

Of all the Virtues fill'd her Royal Breast,
Mercy was chief; still she lov'd it best
In that alone she always took delight,
Hers and her Master's best Favourite
So Great was her Aversion to shed Blood,
She pardon'd all whom she thought Heaven wou'd.

وَالْمُؤْمِنُونَ إِذَا قُرِئُوا إِذَا قُرِئُوا قَالُوا هُنَّا مُؤْمِنُونَ

Full Moon 3 day, full moon 11 am the morning
Last Quarter 9 day, midnite night, 1st 11 am
New Moon 13 day, 4 a'clock morning 1st 11 am
First Quarter 25 day, 11 am the 1st 11 am

~~Did we~~ but feel the Burdens that are bore

By foreign Nations, how the Crowd would roar

Not Heaven it self was ever more inclin'd

To hear the Needy's Prayers or render to be kind:

Yet some bold Villains scorn'd this gentle ^{Com.} ~~Com.~~

And claim'd a Liberty to disobey what we did now.

September hath 30 Days.

ਗੁਰੂ ਨਾਨਕ ਦੇਵ ਮਿਸ਼ਨ ਸੀਰੀਜ਼ ਨੰਬਰ 201 ਵਿੱਚ ਦੇਵ ਮਿਸ਼ਨ

~~Pull Moon 1 day about & in the Morning~~

Left Quarto the 8th day, at 6 in the morning.

New Moon 6th, Full 9th in the morning.

First Quarter, the 24 day, at 4 in the morning.

Full Moon the 22 day, about 8 at night.

September 17 1651

As bounteous Heaven good Oberdon blest,
 Whose Peacefull Houſe the ſacred Ark poſſeſſed
 So whereſoe'er the Royall Prince went, he di nearely weare
 Her great Preseruer, mighty Bleſſing ſrat. o: 11 1651
 No Queen was euer more Heavenly faire, than ſhe, o: 11 1651
 Nor made returns with greater Charitie.

1906.

October Fair Days

Last Quarter the 7th, about 10:30 P.M. 10° 30' S. 104° W.
New Moon 16 days about 8:30 A.M. the morning. 103° 30' W.
First Quarter the 23rd day, about 10:30 P.M. 10° 30' S. 105° 12' W.
Full Moon 1st day, about 8:30 A.M. the morning. 10° 30' S. 105° 12' W.

Her Wisdom so did all her Actions guide,
Angel she liv'd, and hit a Saint the world over.
Methinks I see her on her Desribed b'ye, as soon as
Her Consort and her weeping Subjects by
Van all Endeavours, wills all our Care, & all our skill
A'fraid to hope, unwilling to despair.

November 1806.

Triumphant Sorrows sit on all our Broads
And nought for ease, but ready Tears allow; & much woe
Deep Silence bound up every anguifull Tongue,
And pensive Hearts like fading Flowers hung:
Fixing their weeping Eyes upon her Face,
Which dying still kept each Maidsick Grace.

Decem

1696.

December last xxxi Days.

Last Quarter 6 days, New Moon. New Moon 8 days, about 8 in the morning.
First Quarter 27 days, about 8 in the morning.
Full Moon 28 days, about 9 AM in the morning.

December, 1696.

But when pale Death with his great Mandate came,
For the Blest Spirit of our Mighty Dame,
Sawc our own Souls, could the weak Fots maintain,
But almost sunk beneath the weighty pain.
None without Tears could the sad Story tell,
So mourn'd, so pit'd, mighty M.A.R.T. etc.

A Chronology from the beginning of the World to this present Year, 1696.

Since

The Names and Characters of the Twelve Signs.

S	Aries, Head.	S	Libra, Reins.
T	Taurus, Throat.	S	Scorpio, Secrets.
G	Gemini, Arms.	S	Sagittary, Thighs.
C	Cancer, Breast.	S	Capricorn, Knees.
N	Leo, Heart.	S	Aquarius, Legs.
M	Virgo, Belly.	S	* Pisces, Feet.

The Names of the Seven Planets, and the Dragons Head and Tail, with their Characters.

H	Saturn.	\odot	The Sun.	\triangleright	The Moon.
J	Jupiter.	\odot	Venus.	\odot	Dragons Head.
M	Mars.	\odot	Mercury.	\odot	Dragons Tail.

The Names and Characters of the Five Aspects.

C	Conjunction.	\square	Quartile.	Δ	Trine.
*	Sextile.	\square		\odot	Opposition.

A Conjunction, is, when Planets are in 1 Sign and Degree.

A Sextile, is, when distant 2 Signs.

A Quartile, is, when distant 3 Signs.

A Trine, is, when they are distant 4 Signs.

An Opposition, is, when the Planets are distant 6 Signs.

The

The Government of the Moon over
the Body of Man.

The Princely Ram, clad in his golden Wool,
Looks back, admiring to behold the Bull
Against him rise, who with a cheerful Face
Calls to the Twins, to bid them mend their Pace.
The Crab there follows, and the Lion than;
Next the Celestial Maid (not known by Man:))
Libra comes after, who (lest Time should fail)
Weighs out the Days and Nights in equal Scale;
And calls the Scorpion on, who in his Train
Bears a bright fulgent Star: At which (in vain)
The Centaur (with his String drawn to his Ear)
Arms his keen Shaft: The Goat doth next appear,
That's Capricornus call'd, who oft-times lours,
Because, to quench his Star, Aquarius pours
His Laver forth: Next after him be plac'd
Pisces, which of the Twelve Signs is the last.

The Explanation of the preceding TABLES of the Pleiades, or Seven Stars.

THE Table of the Pleiades, or Seven Stars, contains Ten Columns : The first, towards the left-hand, expresses every Other Day of each Month, as 1, 3, 5, 7, 9, 11, &c. till you come to 31. The second shews their Rising in Hours and Minutes. The third, their Southing. The fourth, their Setting ; as is plain by the Titles at the Top of each Column : and so in the fifth, sixth, seventh and eighth Column, the same. And also the ninth and tenth is contained the Rising, Southing and Setting of the Seven Stars, for every Other Day throughout the Year, (as is plain to the meanest Capacity.) Observe also, That the letter [A] denotes Afternoon ; and [M] the Morning. As for Example :

Suppose I desire to know the Rising, Southing and Setting of the Seven Stars, on the Eleventh of January ? I find 11 in the first Column towards the left-hand, under the Title Month Days : and against 11, and under January, I find that the Seven Stars Rise 54 min. past 10 in the Morning, as the letter [M] denotes : and that they come to be South 14 min. past 7 in the Afternoon, as the letter [A] denotes : and Sets 26 min. past 3 in the Morning, as the letter [M] denotes. And also on the Eleventh of February, they Rise at 52 min. past 8 in the Morning ; and South at 8 min. past 5 in the Afternoon ; and Set 28 min. past 1 in the Morning. And on the Eleventh of March, they Rise 8 min. past 7 in the Morning ; South 25 min. past 3 in the Afternoon ; and, lastly, Set 40 min. past 11 in the Afternoon, as the letter [A] denotes.

The Explanation of the following TABLE, shewing upon what Point the Moon is, when it is Full-Sea at any of these following Places.

If you would know what time of the Day it is High-water at London, Tirmouth, or any other Place ; it is but adding the Hours and Minutes of the Moons Southing, to the Hours and Minutes against the Place, and the Summ is the time of High-water ; subtracting 12, if your Number exceed it, and the Remainder shews the Time.

A TABLE shewing upon what Point of the Equator the Moon makes a Full-Sea in any of the under-named Places, with the Hours and Minutes to be added to her coming to the South, for the Time thereof.

Astrological Judgments

For the Year M D C X C VI.

By MATTHEW HOBBS,

Student in Physick, and living at Swanbourne in
Buckingham-shire.

THE Stars, whose various Aspects seem the Birth
To Peace or War, transacted here on Earth,

If you enforce the Actions, you portend
Good William's Triumphs, and the Tyrant's End :
If your Positions fill the Barns, or batch
The Merchants Incomes, and the Lovers March ;
Come do it now.

Swift as our Thought, and nimble as our sight,
You dart from Heaven to Earth your Beams of Light :
But the soft Peace and Quiet you foresaw,
Our eager Wishes think their pace too slow,
At distance you can hit a certain Blow :
Come do it now ; Remove the Gallic Sway,
And smile on Europe with a Halcyon Day.

Kind Heaven does not impell, it but inclines,
Whilst our bad Deeds prevent us good Delights :
The Good that Heaven designs, bad Men defeat,
And then say out, Chaldean's but a Cheat.
Whilst I write nought but what's foreseen'd as clear
As are those Sparks that deck the Starry Sphere,
They tend to bless us : But Man wages War,
'Gainst Heaven it self, and so defeats the Stars.
You Enemies to Heaven, and Friends to Foe,
'Tis you forebore our Good, and fix our Woe :
Whilst you impede those Blessings Heaven points out,
You cheat the Kingdom and your selves to boot.

Of

1695. 100-1696.

Of the Winter Quarter.

The Winter Quarter begins on the 11th of December, 1695, about 41 Min. past Noon, and at that time we have 25 degrees of *Aries* ascending, and 10 degrees of *Capricorn* in the Mid Heavens, and *Saturn* is 16 degrees in the same; *Jupiter* is in *Virgo*, and so is *Mars*, and both in the 6th House; the *Sun* is in the 9th, and *Venus* in the 7th, in a Sextile to *Jupiter*; *Mercury* is in the 8th House, in the Sign *Sagittarius*, and very near the Dragon's Head; and lastly, the Moon is in 11 degrees of *Cancer* in the 4th, and is separated from a Sextile of *Mars*, and applies to an Opposition of *Saturn*, and a Trine of *Venus*, and a Sextile of *Jupiter*. And thus stands the Position of the Winter Quarter.

The Sextile of *Jupiter* and *Venus*, denotes the Unity of Friends, and the Trine of *Saturn* and *Jupiter*, portends to Peace, and the Agreement of Great Persons, &c. Proclus says, That if the Sun be in the 9th House, in Revolution of the World, he shews, that the People shall be fortunate and successful in long Journeys, and Voyages, and shall love and delight in both the Law of God and Man: And *Mercury* in the 8th, he says, Shall cause the Death of many Young Men, Women, and Children.

Saturn in *Capricorn* causeth a temperate Air, and a healthy Season, and moderate and seasonable Rains; the State of Great and Noble Men will be good; the Doctrine of those Times will be most agreeable to the Holy Scriptures, tending unto a more perfect understanding of the Nature of the Deity and Trinity, than this Socinian Age will allow, when there will be teaching of Rude and Plain People, the true way unto good Life and Doctrine, that thereby they may attain the direct way unto Heaven.

The Diseases are like to be, Burning Fevers, and Tormenting Pains in the Guts, and other violent Diseases proceeding from Choler and Flegm. Of

Of the Spring-Quarter,

THIS Quarter begins March 9th. about 40 min. past Noon, &c. Here we find England's Ascendant in the Mid-heaven, and ♀ Lord thereof, in ♈, — a Sign of his own Nature, and in Reception of the ☽, and also in a Δ to the M. C.

This portends great Peace and Quietness to the English Nation: *Sapienter pars causa bellum geruntur*: Wise Men maintain War to obtain Peace.

Pax optima rerum, — quas homini prouise datum est: pax una triumphis innumeris potior.

PEACE the Best Mistress that a Man can court,
To which a World of Triumphs do come short.

Now the Strings of the Irish Harp be all in tyme, and make a good Harmony. The English Merchant brings home Wine and Oil to make glad the Heart, and cheer the Countenance of Men.

The Times are coming, in which the Plough-man shall sow in Peace, in Hope, and reap in Joy; when there shall be no leading into Captivity, no complaining in our Streets: but we shall sit under our own Vines, and under our own Fig-trees, merrily eating the Fruits of our own Labours.

There are Great Designs now on foot against that usurping Sultan of *Rome*; and, in a short time, the battering Pieces will shake the Foundations of that Italian *Babylon*; so as the very Sultan there seeing the defection of some, and the wavering of others, must needs say in his Heart, as *Heitor* himself did, a little before the Downfall of Troy, *Ἐγενέτης οὐτὸς ποτὲ ὀλόγης*. And who knoweth whether the Divine Providence hath not appointed, that in these our Days *Rome* may fall? Here is also denoted the Glory, Renown, and Honour of our King: And ♀ in ♈ denotes the Courage of the English Soldiers. We fear some Misfortune or Trouble about the beginning of the Year, but soon amended, and better Things daily expected — I am afraid that the French may do us some Hurt in some of our Ports, or Towns

Astrological Judgments for the Year 1696.

Towns bordering upon the Seas.—But tho' they may think *Egregias laudes & spoliis ampliassere*, to carry away Prize and Praife,—these Dogs may return couchant, as ever they came falien, and leave no token that ever they invaded England, but those Marks that shall be engraven upon their Carcasses by the valourous Hand of our Victorious Nation.

The Sun being in or very near the 10th. House, and Lord of the Ascendant and of the Year, and also in Reception with Mars, who is Lord of the 10th. and of England's Ascendant also. Some have affirmed, That neither the Sun or the Moon can be Lords of the Year, tho' they be fitted for that Dominion, by House, Exaltation, or Triplicity. “It's an Error, (saith the Learned Mr. Lilly) by whomso-“ever maintained: Every Planet, by Ordination, at its“first Creation, was appointed to perform the Work he was“made for, until the Sun, Moon, and Stars shall appear no“more.

But sith the Actions of this Year do seem to concern the highest sorts of Men, let us see what the Sun, being Lord of the ensuing Year, doth or may promote unto the Magistracy of this World, and peculiarly to those of England, Scotland, and Ireland: For Guido Bonatus says, *Cum autem fuerit Dominus anni Sol, & ipse bene dispositus, (qui nunc est)* significat sublimitates atque exaltationes regum, & gloriam, & bonorum, &c. When the Sun is Lord of the Year, as in this present Year 1696 he is, and strong, as in the Figure of the World he is, he imports much Good to Kings, or Governours of Nations and Provinces; and that the King, or Governour, or Ruler of that Country wherein the Sun is, shall highly advance his Honour, shall endeavour to enlarge his Confines, or Territories, or to add something unto them by a new Conquest. And not the King, Governour, or Ruler only, shall aim at such Matters; but every Person of that Nation, who is fitted or qualified according unto the measure of his Capacity and Fortune, shall labour to augment his Fortune and Estate.

The Diseases which are like to be this Quarter, are Consumption, Dropsie, Scurvy, Cankers, Sciatica, Palsie, Obstructions, and Colick, Dislocations, Scabs, and Melancholy.

Astrological Judgments for the Year 1696.

Of the Summer Quarter.

This Quarter takes its beginning on the 10th. of June, 31 min. past 2 of the Clock in the Afternoon, at which time we have about 5 deg. of Δ culminating, and 26 deg. of Σ arising in the East; ♀, Lady of the Ascendant, is in 10 deg. of II, in the 8th. House, and in square to the Σ , who is in about 10 deg. of \times in the 5th. House, and applying to an 8 of V and 8, and they both in a 4 in the 11th. House; Σ is got in the 2d. House, and 2 in the 9th, applying to his 3. And thus stands the Position of this Quarter.

In the 11th. in a 6 with 5, doth not only portend Happiness to those Countries subject to that Sign ♡ is in, and the Earthly Triplicity in general; but also much prosperity, Peace, and Plenty to the Subjects of this our Nation, notwithstanding their groundless Fears, whence they may take encouragement, and trust to Providence: And if in our Astrological Judgments we do not fully hit the white, let none traduce us, or think it strange, since we cannot promise a certain and intubitable prescience of future Events or Contingencies. But as the Learned Physician, who prognosticates what the Issue of Distempers may be in the sick Patient, so we, by Astrology, give Warning to Mankind of the Dangers impending or approaching, that by Prayer, and humble Submission to the Almighty, we may thereby be preserved from his Judgments threatened. "For no Man can pretend to an absolute Infallibility in Predictions, such a Prescience only belongs to the Great God of Heaven and Earth, who created the Stars, and perfectly knows their Natures and Virtues, and how their Influence operates upon inferior Bodies, saith my Author. But Astrological Predictions, or probable Conjectures of future Events from second Causes, we hope, without offence, we may freely offer as harmless and inoffensive, for the general Satisfaction of the Publick, who annually expects Sentiments deduced from Astrological Principles, as to general Accidents of Mundane Affairs."

We have at the ☽ entrance into V, a fix'd Sign ascending; therefore I shall conclude with as few Words as I can,

Astrological Judgments for the Year 1696.

Can, and take the less notice of this and the next Quarter. Here is denoted prosperous and gainful Voyages to the Merchants, and that they shall be blessed with many safe and profitable Returns.

The Diseases which are likely to be most predominant this Quarter are Impediments in the Meseraicks, the Spices, Hypochondriack Melancholy, Yellow Jaundice, Small Pox, Vertigo, Lethargy, Catalepsie, Apoplexy, Palpitation, Cramps, Melancholy, Falling-Sicknes, and Convulsions, with others both occult and complicated, and consequently difficult for the most learned Physician to remove or root out.

Of the Autumnal-Quarter.

The Autumnal or Harvest Quarter begins when the ☽ enters ♋, and that is this Year, on the 12th. of September, about 53 min. past 5 of the clock in the morning; and at that time we have 28 deg. of ♉ ascending, and also 28 deg. of ♊ in M. C. the ☽, ♍, ♀, and ♈, are all in the Ascendant, which denotes a prosperous and a favourable time to the Country Farmers: And as they are all a Δ to ♋, the Sign which is possessing the Mid-heaven, may furnish the Citizens with a better Trade than they have had. ☥ is in the 3d. House, in his own Sign ♌, very near the ☽; ☐ is in the 4th. in ♏; and lastly, the ☽ is in the 12th. House, in the 5th. degr. of ♈, &c.

It is very pleasing unto us, that we find ☽ who hath very great Dominion over the English Nation, so rampant as he is, I hope our Land and Sea-Forces will have answerable Success unto his Strength. Hitherto God hath manifested himself very much for us against all our Enemies.—The French may expect many sad Mischances to attend their Ships, and Land-Forces, in all parts of the Habitable World; and without an especial Hand of Providence, some more than ordinary Miscarriage in their Country will be manifested by mortuous and distemper'd Persons.

The Diseases of this Quarter are like to be Pleureties, Evil-Liver, Shortness of Breath, the Gout, Lameness, and many Diseases coming of salt Flegm, &c.

Th

Astrological Judgments for the Year 1696.

The Country Men, or vulgar Farmer, is in great danger, and may suffer much in their Cattel, both great and small; and we fear those harmless Beasts and Creatures will be deprived of their very Life or Being. And let the Country Cowleeches, or Farriers, versed in those kind of Physicks, give unto the infected Cattel such Medicins as strengthen the Liver, and do comfort the Heart, or enforce the Disease from thence; and after, let him be sure to give such things as purge and cleanse the Intestines. Those Herbs, attributed to Jupiter and Venus, rightly appropriated, will do the Cure, *Consideratis considerandis.*

We write not these Things, as if we were either Farrier, or Cowleech; but out of Civility to our Country Men, and those industrious Farmers, who rent much Grounds, and may have too sensible a feeling of that Judgment we have delivered. We do from henceforth promise every Year something which may be acceptable unto him in all our Labours.

Of the ECLIPSES that will happen in this Year, 1696.

There will be but Two Eclipses visible to us this Year, and they are both of the Lesser Luminary, the Moon: And they happen in this following order:

The Fifth will be on the 7th Day of May, about 11 min. past Midnight; It will be visible and total; it happens in the 10th House, the House of Honour. We have *Saturn* in the ascendant Retrograde, and just risen above our Horizon, and in a *Sextile* to the *Moon*, and *Trine* of the *Sun*: *Mars* governs the Place eclipsed, and is in the *West Angle*, the House of Quarrel and Strife; therefore its Effects may end in Duels, and Warlike Actions. This Eclipse happens in about 26 degr. 59 min. of *Scorpio*: And *Funditus* says, That when either the *Sun* or *Moon* shall be eclipsed in *Cancer*, *Scorpio*, or *Pisces*, it threatens Death, and Slaughter of obscure, common, plebeian kind of People, continual Quarrels, and Sedition, and great Damage

to

Astrological Judgments for the Year 1696.

to Navigators, and such as converse in the Sea, or Sea-Affairs; great Thunder and Lightning, and sometimes Earthquakes; also Destruction to Creatures in the Water; and this in those Countries subject to the Sign *Scorpio*. You may find at large what Countries are under this Sign, and all others, in (my honoured Friend, Mr. Henry Coley's) *Clavis Astrologia*, Chap. 9, Pag. 91, 92, 93.

The Second Eclipse will be October the 30th. 42 min. past 4 in the Morning, and will be visible, and total also: The Moon is eclipsed in 17 degr. 46 min. of *Taurus*. We have at that time 24 degr. of *Cancer* culminating, and about 18 degr. of *Libra*, arising in the East-Angle. Jupiter is in 16 degr. of the same Sign, and just risen above our Horizon, as Saturn was in the last Eclipse. An Eclipse of either the Sun or Moon happening as this doth, denotes the Death of some great Lady; and Scarcity of Seeds, and Barrenness of the Earth, and a Scarcity of Corn: And this in those Countries subject to the Sign *Taurus*. But we hope Jupiter's being in the Ascendant, with the Virgin's Spike, may lessen its bad Effects, &c.

The CONCLUSION.

THUS ends the Actions of this wondrous Year,
Great Things are past, but Greater must appear:
The Gallian Fury, whose infernal Brand
Inflam'd the Nations, on the Flemish Strand
Expiring lies, and shall no more revive,
Nor us of pleasing Rest, and sacred Peace deprive.
The Avenging Angel now prepar'd do's stand,
(His brandish'd Weapon flaming in his Hand.)
At Rome th' inexorable Dart less fly,
And stains her Purple of a deeper Die;
And she who long had drank an impious Flood
Of Slaughter'd Saints, and Constant Martyrs Blood,
Now in her own distain'd and weeping lies,
And to her wrathful Foe becomes an easie Prize.

Astrological Judgments for the Year 1696.

Let 20. 62. and 21. hours rule but, notwithstanding of
cominc. **Whose** wonderous Glories brought by Heaven's command
that sacred Truth imbrac'd in darkness Heaven dispense
unto (Decrees eternal that must come to pass against his
hys Will in huge Folds of Everlasting Braes) is but yon
Time preses to reveal. (See p. viii) in astrologie his
Wolst all amaz'd, into Earth's secret womb, with a wond'rous
Desire to pry, and see th' Events to come:

Let the kind Reader due Attention lend to the second Part
Our future Labours shall hit With his friends. Now in a
moment to and fro, as if in his life he had been on
a bus, givisg us the C. T. N. I. S. which is even
as signall as any thing in this world to see what
events will be. See also the note at the end of this
part. But now comes the second part of the year, and
Advertisements, how to live the best, and to do the
best for the rest of the year. But we will now leave
the year, and come to the year 1697. And we will
begin with the first month, January.

AT Houghton, in Buckinghamshire, one Mile
from Swanbourne, and Two Miles from Wan-
slow, is an Excellent Physical Spring, of a Cha-
lybeat Nature, much stronger of the Mineral
than Affrop, in great vogue with the adjacent Gen-
try, and approved by their successful Experience.

Bradley's True Spirit of Scurvy, both Plain and
Golden, so long Famous for the Cure of the
Scurvy, Gout, Dropsey, and several other Chro-
nic Diseases, are still prepared by John Brad-
ley, and Parther, and sold at their Shoppe in
Pearl's-Cain, near Doctors Commons. Price One
Shilling each Bottle.

The Grand Balsamic Pills, prepared chiefly
for the Distempers of the Head and Stomach,
made and sold only by John Fletcher aforesaid.
Price One Shilling the Box.
